Response to Amendment

1. The amendment filed 08/10/2006 has been entered.

Allowable Subject Matter

2. Claims 1-10 are allowed.
3. The following is an examiner's statement of reasons for allowance: The amendment made by the Applicant to include the limitation that the anticoincidence counter takes the logical product of the plurality of semiconductor detectors and delays the signal created from the logical product to create a gate signal, which gate signal is then suppressed from an addition signal obtained by adding outputs of the plurality of semiconductor detectors and then analyzed by the peak analyzer, renders the claims allowable over the prior art cited. Prior art Kitaguchi (US 2002/0084420 A1) discloses a radiation detector that includes an anticoincidence counter that creates a gate signal that is then sent to a peak analyzer, however, the prior art does not disclose delaying the signal created from the logical product of the plurality of semiconductor detectors to create the gate signal nor that the gate signal is suppressed from the addition signal obtained from adding outputs of the plurality of semiconductor detectors.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
